

**Proforma For Approval of B. Tech (Hons) V Semester Minor Project
Computer Science & Engineering**

Date:

Name of the students:-

1. Anil Nai
2. Gyan Prakash Patel
3. Anurag katariya

Branch & Enrollment of the students:-

1. Data Science – 300012824009
2. Data Science – 300012824060
3. Data Science - 300012824010

E-mail & Mob. no:-

1. asain4773@gmail.com
2. Gyan.30012824060@csvtu.ac.in
3. mrj26655@gmail.com

Title of the Minor Project:-

BookConnect – Online Book Publishing and Delivery Platform

Name of the Guide:-

Signature of the Guide

Approved

Not Approved

Signature of the HoD

Suggestions for reforming the Minor Project:

Customer Churn & Revenue Intelligence System

The **Customer Churn & Revenue Intelligence System** is a machine learning-based project designed to predict which customers are likely to leave a business and identify the major reasons behind customer churn. The system analyzes customer information, purchasing behavior, engagement, and support interactions using data analytics and SQL. Machine learning algorithms such as Logistic Regression, Random Forest, and XGBoost are used to calculate the probability of customer churn. SHAP is used to explain the factors responsible for each prediction. The system also provides business insights such as churn rate, high-risk customers, revenue at risk, and customer segments through a dashboard. Based on the prediction and customer value, the system can recommend suitable retention actions. The project aims to help businesses reduce customer loss, improve customer retention, and make data-driven decisions.
